Empowered Decisions, Secure Transactions

At the heart of our response strategy lies the goal to foster awareness and equip policy makers/executors and law enforcement officials with a comprehensive knowledge of cryptocurrency & virtual asset operations. By empowering our users with the ability to identify suspicious transactions, trace fund flow, investigate, and swiftly seize, we pave the way towards 24/7 automated regulation and supervision. Our forward-thinking approach aims to significantly curtail felonious transactions and uphold the integrity of the financial landscape.

Identification of Digital Crypto Artefacts

Forensic Preservation & Analysis

Dark Web Search & Risk Management

Fusion analysis of Transaction & Wallets

In-Depth Analysis & Reporting

MACHINE-POWERED, HUMAN-CENTRIC SERVICES

Comprehensive Oversight in a Decentralized World

Benefit from our Audit & Investigation services, powered by machine learning algorithms applied on blockchain data, balanced with an understanding of human behavior and technology-specific variables. Also leverage real-time alerts to make informed decisions that reduce exposure to crypto-based financial threats. This integration yields practical and actionable insights vital for effective Virtual Asset Compliance and Investigation.

DESIGNED FOR AUTOMATION

Automated analytics and data management capabilities combined with API Integrations enable investigators & compliance officers to handle large volumes of data, identify patterns, and generate valuable insights.

01

RISK ASSESMENT & MANAGEMENT

Identify potential threats, suspicious transactions, analyze their risk, and implement strategies to alert, avoid, transfer, mitigate, or accept the risks based on an organization's risk policy & regulatory requirements.

02

AUDIT & INVESTIGATION

In-depth analysis of transactions, wallet, KYC details plays a crucial role in uncovering hidden information, identifying trends, making informed decisions, and gaining a comprehensive understanding.
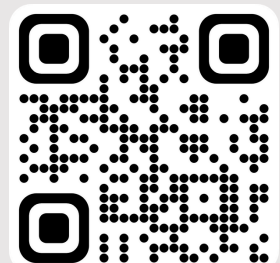

03

ON PREMISE NODES INSTALLATION

On-premises Node installation will enable the use of advanced investigation techniques, manage Watchlist & Alerts, in a private network. Cloud Instance also available.

TRAINING 3.0

CRYPTOCURRENCY INVESTIGATION

The Need of Web 3.0, Cryptocurrency Investigation Training, a specialized course designed to equip you with the skills to navigate the intricate world of digital currencies & virtual assets.

Our curriculum focuses on:

Mastering Transaction Pathways

Learn to decode blockchain transactions, reveal concealed wallet IDs, and establish comprehensive asset flow maps.

Algorithmic Analysis for Investigators

Understand how machine learning can be deployed to automatically detect anomalous transactional patterns indicative of illicit conduct.

Empirical Risk Modeling

Master a data-driven approach to risk assessment by employing statistical models that rate the risk profile of various transactions and digital assets.

Personalized Risk Metrics

Develop the capacity to generate and interpret custom risk metrics that align with your organization's specific criteria and tolerance levels.

Case Studies in Action

Engage with meticulously researched, real-world cases to derive tangible insights into the complexities of cryptocurrency investigations.

Sector-Specific Strategies

Benefit from a curated set of industry-relevant case studies that provide a nuanced understanding of cryptocurrency investigation across diverse domains.
